ahi.

ARTIFICIAL HARMONIOUS INTELLIGENCE

A beginner's guide

What AHI is, what you need, and how to set it up from nothing — with every price and link checked on the provider's own site.

- **M** Michael — Your right hand
- **T** Tzali — Builds & fixes
- **Av** Avi — Design
- **Mi** Miriam — Personal life

Prices and links checked on **November 5, 2026**. The provider's own page is always the final word.

For AHI version 1

WELCOME

What AHI is

AHI is a small team of AI helpers that lives on **your own computer**. You talk to them in a calm app in your web browser — by typing, by voice, or, if you like, from your phone.

What makes AHI different from a chat window is that it **remembers and it works**. Your helpers keep notes between conversations, keep your files in one folder you own, and can take a task from "can you look into this" to done while you get on with your day. Each one has their own character and job; you can change how they talk to you, but not who they are.

M **Michael**
Your right hand — plans, keeps track, and brings you what needs a decision.

T **Tzali**
Builds and fixes software, and keeps your setup running.

Av **Avi**
Design — turns ideas into thoughtful visuals and products.

Mi **Miriam**
Your calendar, your documents, and a patient ear.

A NORMAL DAY

How it fits into your day

MORNING
You ask Michael what matters today. He lays it out: what's due, what moved overnight, what needs you.

DURING THE DAY
A quick voice note — "remind me to call the bank, and draft a reply to that email" — and it's handled.

EVENING
Miriam helps you plan tomorrow. Less to remember, fewer things dropped, one place where it all lives.

Your data stays yours. Everything lives in the folder you choose on your computer. AHI sends a conversation to the AI you connect only when you talk to a helper, and never sends your key or your files anywhere else.

BEFORE YOU START

What you'll need

Only two things are required. Everything else can wait until you want it.

A computer REQUIRED
Mac, Windows or Linux. AHI runs here, so it must be on while you use AHI.

Claude REQUIRED
The "brain" your helpers think with. From $20/month.

A voice service OPTIONAL
So your helpers can speak and listen. Free tiers; $5/month and up.

Cloudflare + a domain OPTIONAL
A private address to open AHI on your phone. Account and tunnel free; a domain is a yearly fee at cost.

Codex OPTIONAL
A second AI you can connect; the helpers don't use it yet.

Your accounts OPTIONAL
Gmail, Calendar, Drive, GitHub, WhatsApp — later, with your permission.

THE SHORT VERSION

What it costs per month

Trying it out

$20

Claude Pro · Cartesia Free or no voice

Using it every day

$100 + voice

Claude Max · OpenAI voice, pay as you go (pennies a minute)

Living in it

$327 – $727

Claude Ultra $200 · ChatGPT Pro $100–$500 · ElevenLabs Creator $22 · Cartesia Pro $5

Plus a domain's yearly fee if you want phone access. Details and sources on the next pages.

STEP ONE OF YOUR SHOPPING LIST

1 The AI model: Claude

Claude, by Anthropic REQUIRED

The thinking behind your helpers. AHI Setup installs Claude's official tool, Claude Code, and you sign in with your own account — AHI never sees your password.

> The Free plan does **not** include Claude Code, so you need **Pro or above**.

BUDGET · LIGHT USE

Pro

$20/month

Or $17/month billed yearly ($200). The baseline amount of use every 5 hours and every week.

Sign up →

RECOMMENDED · OUR PICK

Max

$100/month

5× Pro every 5 hours and every week. Comfortable for daily use with several helpers.

Sign up →

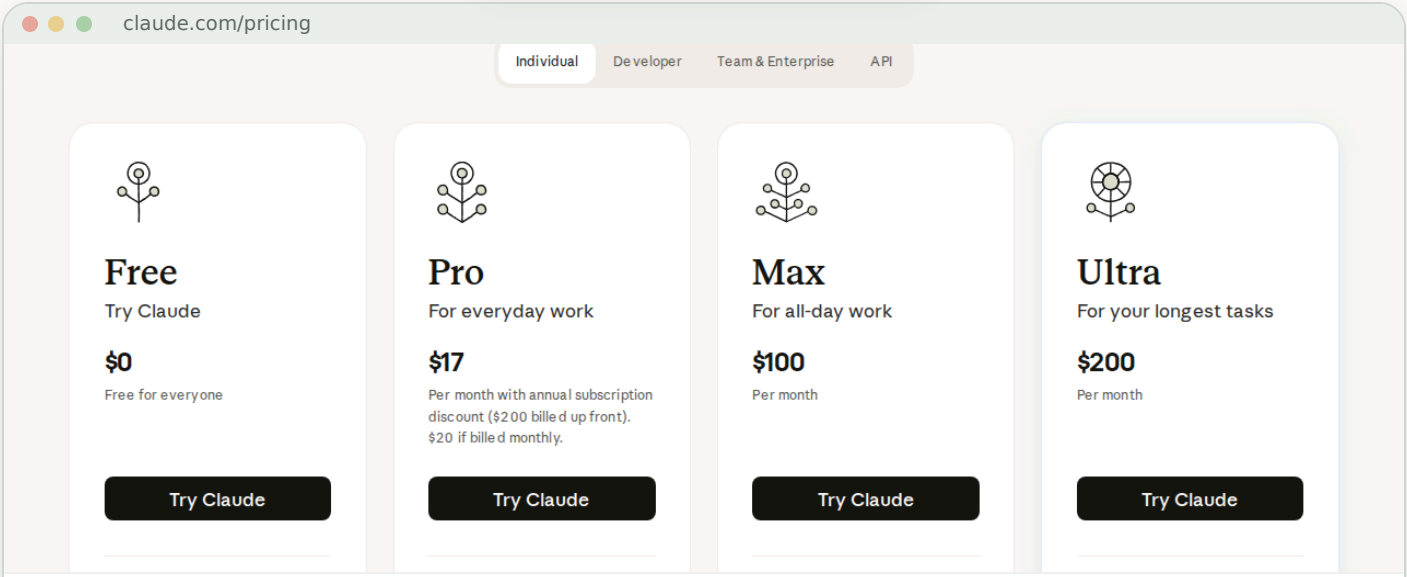

HEAVY USE

Ultra

$200/month

No 5-hour limit for verified accounts; 10× Pro every week.

Sign up →

Claude's own pricing page: Free, Pro, Max and Ultra. Seen on November 5, 2026.

Source: claude.com/pricing.

Optional: Codex, by OpenAI OPTIONAL

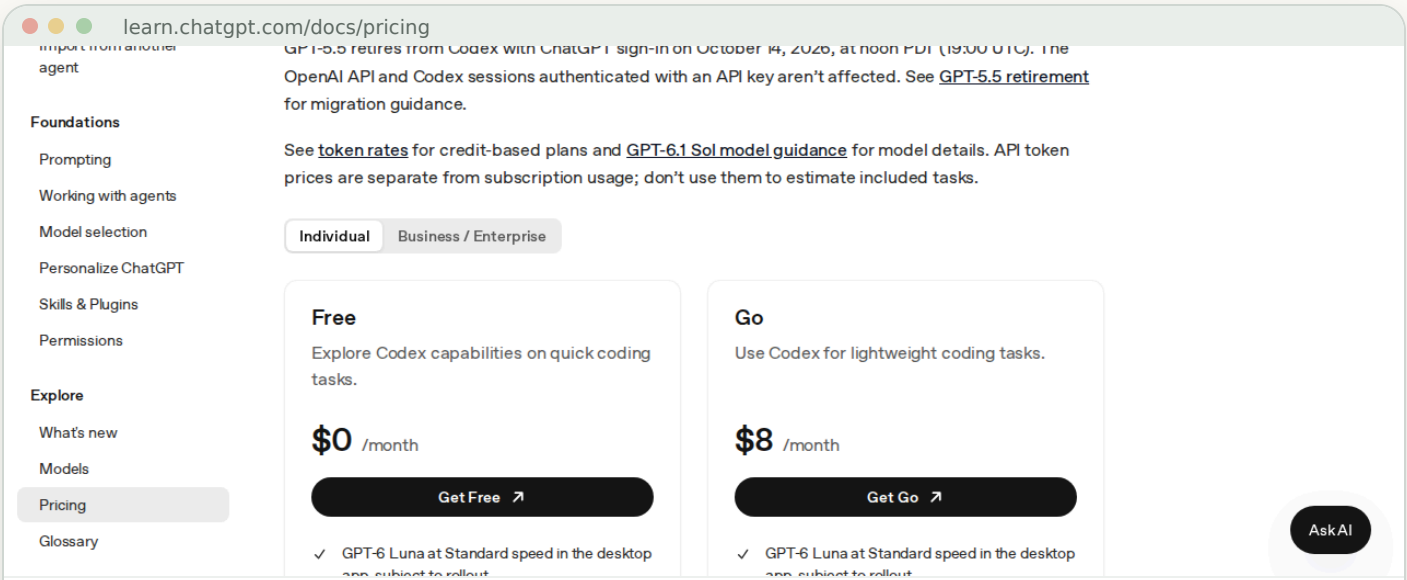

OpenAI's coding assistant, included with ChatGPT plans. AHI Setup can connect it, but **in this version your helpers think with Claude only** — Codex is for your own coding, and for later versions of AHI.

TRY IT

HEAVY
Pro
$100 / $200 / $500
Higher-volume use.
Sign up →

OpenAI's own Codex pricing page. Seen on November 5, 2026.

WHICH ONE?

CLAUDE
If you want AHI — it's the one your helpers use, so it's required.

CODEX TOO
If you write software yourself and want a second, strong coding assistant.

BOTH, TOP PLANS
If you use AI all day: Claude Ultra for your helpers, ChatGPT Pro for your own heavy coding.

Source: learn.chatgpt.com/docs/pricing. AHI Setup can also connect Google's Gemini; like Codex, the helpers don't use it yet, so there's nothing to buy for it now.

OPTIONAL

2 Voice: speaking and listening

Text-to-speech lets your helpers talk back. **Transcription** (speech-to-text) lets them hear your voice notes and calls. Any of these four can speak; **only OpenAI and Cartesia can also listen**, so for voice calls pick one of those two.

OpenAI API

Recommended · pay as you go

Speaks **Listens**

Speech: $0.60 per million text tokens in, $12 per million audio tokens out (gpt-4o-mini-tts). Listening: $0.003 per minute (gpt-4o-mini-transcribe). One key does both.

Create an API key →

Cartesia

Budget · $5/month (Free: $0)

Speaks **Listens**

Pro: 100K credits a month — about 133 minutes of speech or about 9 hours of listening. Free: 20K credits.

Cartesia Pro →

ElevenLabs

Most expressive · Creator $22/month

Speaks **Can't listen in AHI**

Creator: 121K credits, about 121 minutes of speech ($11 the first month until Nov 8). Pro: $99/month. Pair with OpenAI or Cartesia for calls.

ElevenLabs →

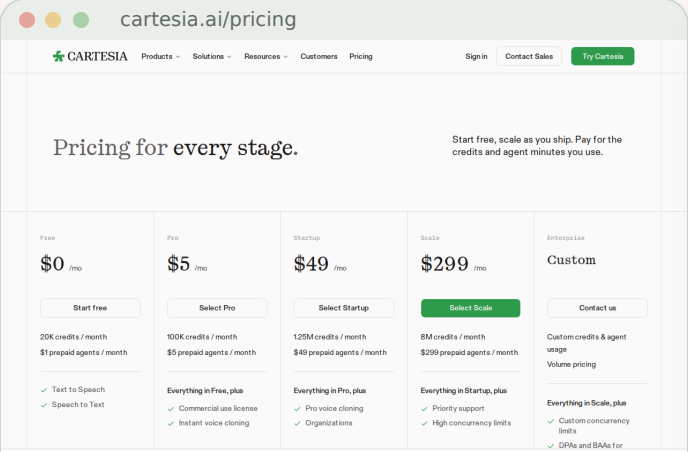

Gemini API

Free to try

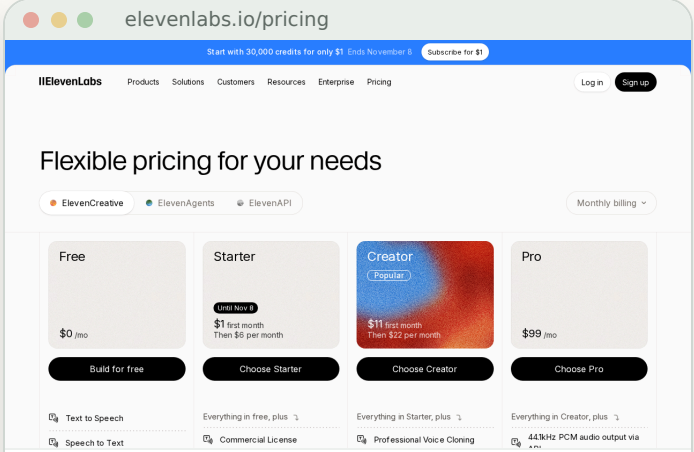

Speaks **Can't listen in AHI**

Free tier. Paid speech from $0.50 per million text tokens in and $6–$20 per million audio tokens out, by model.

Get a Gemini key →

Cartesia's plans. Seen on November 5, 2026.

ElevenLabs' plans. Seen on November 5, 2026.

OPTIONAL

3 Access anywhere: Cloudflare

Cloudflare Tunnel + a domain

By default AHI opens only on the computer it runs on. A tunnel gives it a private address (like ahi.yourname.com) so you can open it on your phone — without opening anything on your home network. Your computer has to stay on.

FREE · OUR PICK

Cloudflare account

$0

The Free plan is enough.

Sign up →

INCLUDED

Cloudflare Tunnel

$0

"Available on all plans." Set it up from inside AHI Setup.

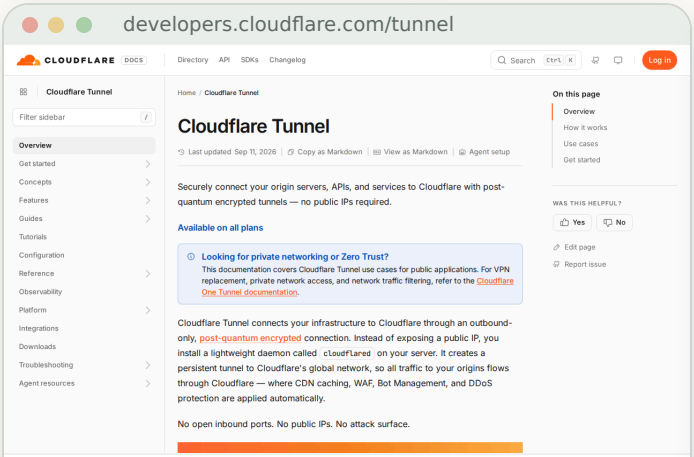

YEARLY

A domain name

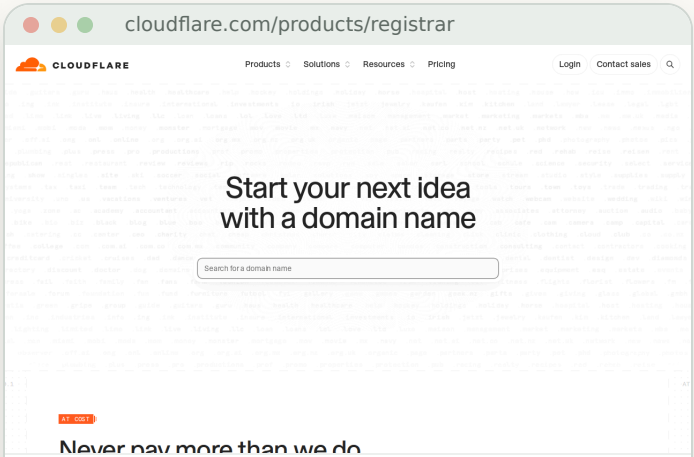

At cost

Sold at cost, no markup; the exact price shows when you search for a name.

Tunnel: "available on all plans". Seen on November 5, 2026.

Registrar: domains at cost. Seen on November 5, 2026.

ALSO IN SETUP

4 Everything else setup asks for

Your first name and a name for your space; a folder where AHI should live; and, if you like, which accounts you'd like help with later. Nothing connects during setup — later, your helper walks you through each service's own sign-in, and you approve what it can see.

Gmail · Calendar · Drive · GitHub · WhatsApp

Sources: Cloudflare Tunnel docs · Cloudflare Registrar.

LET'S GO

Setting up, step by step

1 Get your Claude plan

Sign up for Claude Pro or above (page 4). Use an email you check; you'll sign in with it once during setup.

2 Optional: get a voice key

For voice, create an OpenAI API key or a Cartesia account now (page 6) and keep the key handy. You can also add voice later.

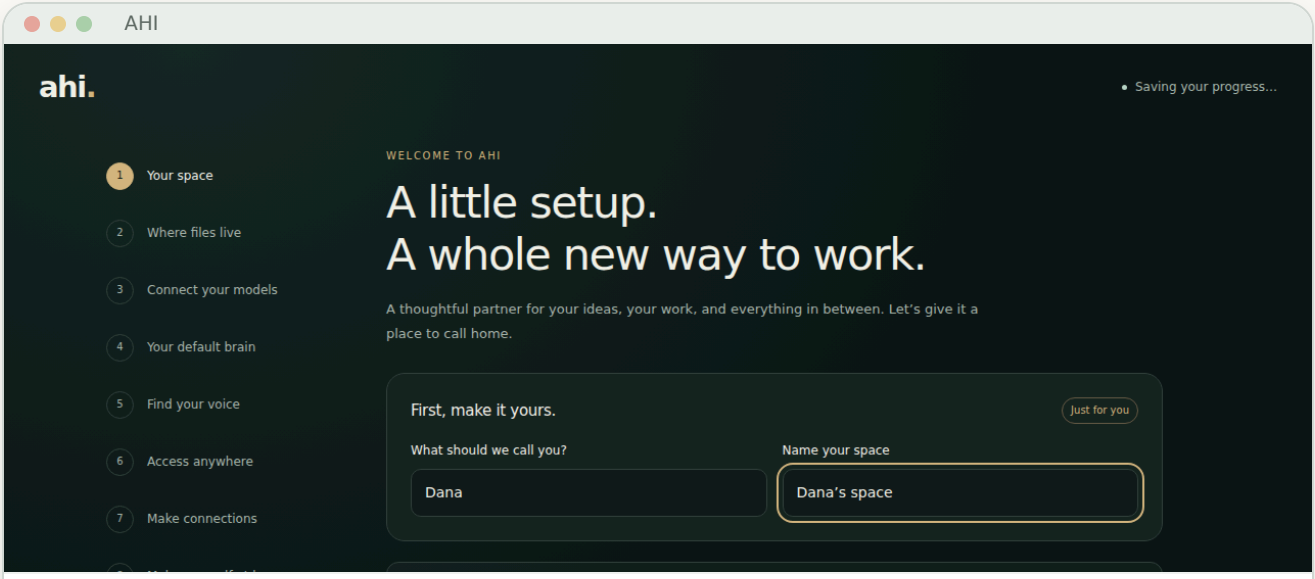

3 Download AHI Setup

On the AHI page on GitHub, open **Releases** and download the file for your computer: **.dmg** for Mac (arm64 for Apple silicon, x64 for Intel), **.exe** for Windows, **.AppImage** for Linux. Open it.

> The installers aren't code-signed yet. On a Mac, right-click AHI Setup and choose **Open** the first time; on Windows choose **More info → Run anyway**.

4 Your space

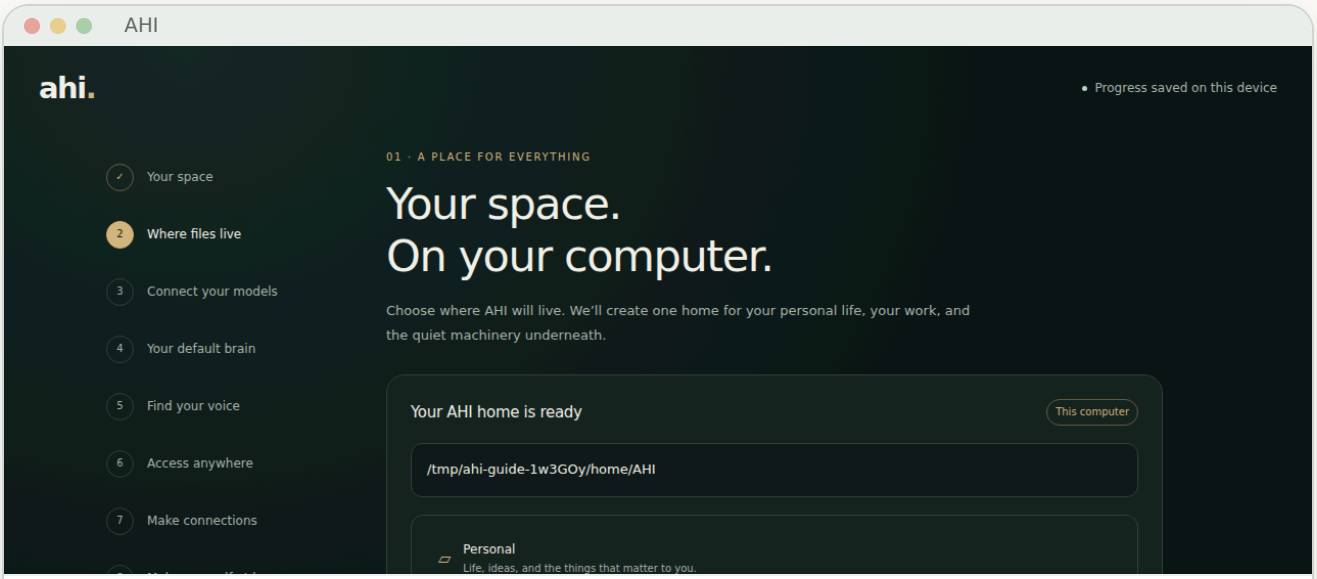

Type your first name and a name for your space, then **Continue**.

AHI Setup, first screen.

5 Where files live

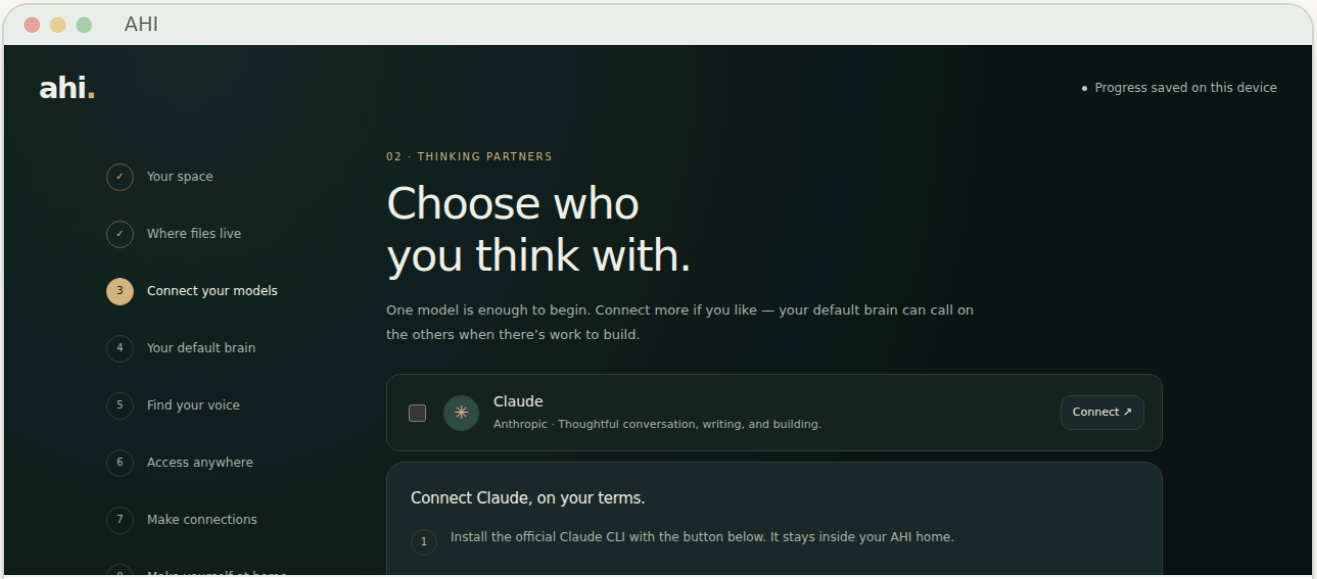

Click **Choose folder…** and pick where AHI should live — your home folder is fine. AHI makes a folder with **Personal** and **Work**, plus a hidden system folder for your helpers.

Your AHI home, ready.

6 Connect Claude

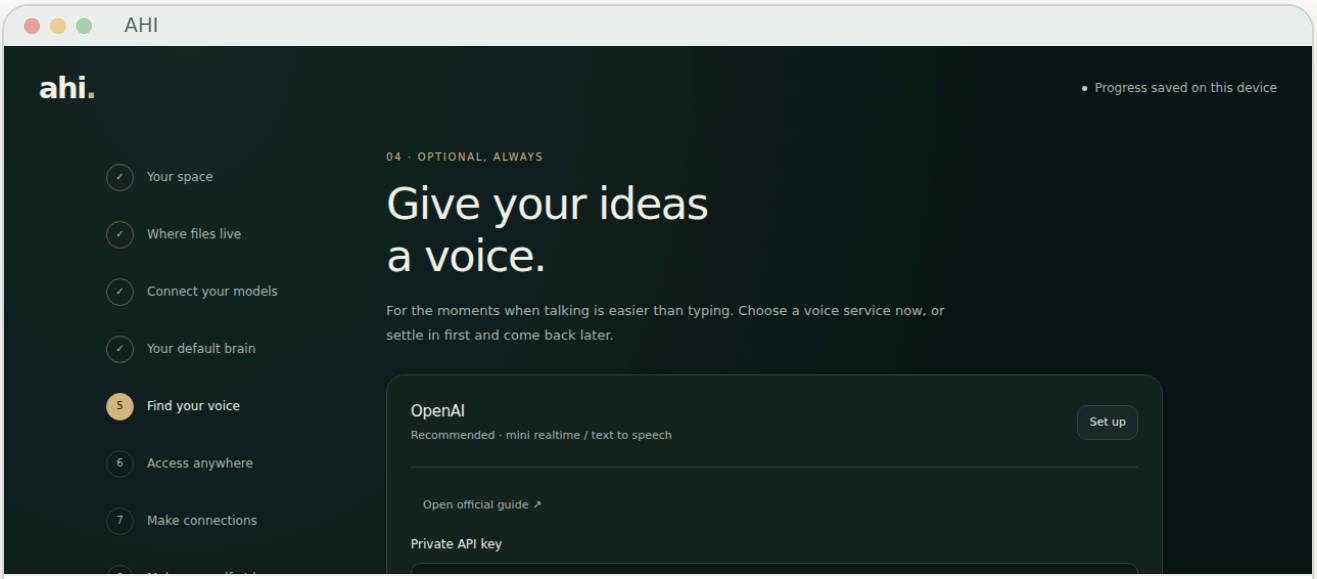

Tick **Claude** and press **Connect**. Then **1. Install CLI** (Claude's official tool, kept inside your AHI folder), **2. Open sign-in** (Claude's own login opens — sign in), and **3. Check connection** (a tiny test message). When it says **Connected** ✓, continue; on the next screen Claude is your default brain.

Connecting Claude: install, sign in, check.

7 Voice — optional

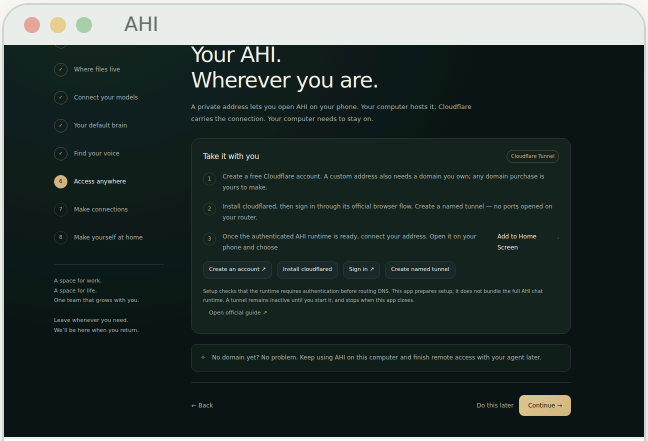

Pick your voice service, paste the key, and press **Verify & save key**. Or choose **Do this later**.

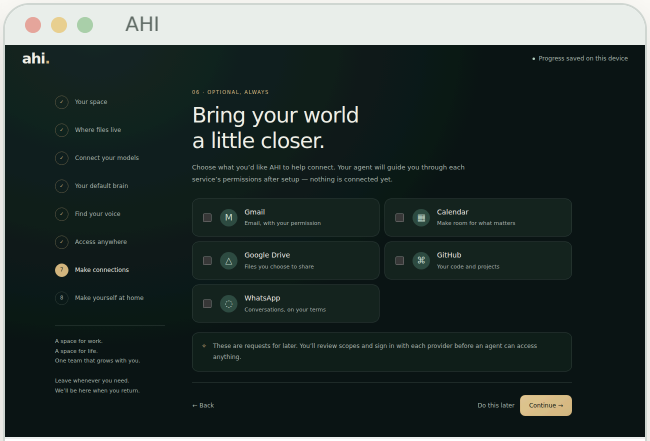

Voice: paste a key, or do it later.

8 Access anywhere & connections — optional

To open AHI on your phone, follow the Cloudflare steps; most people choose **Do this later**. Then tick the accounts you'd like help with — nothing connects now.

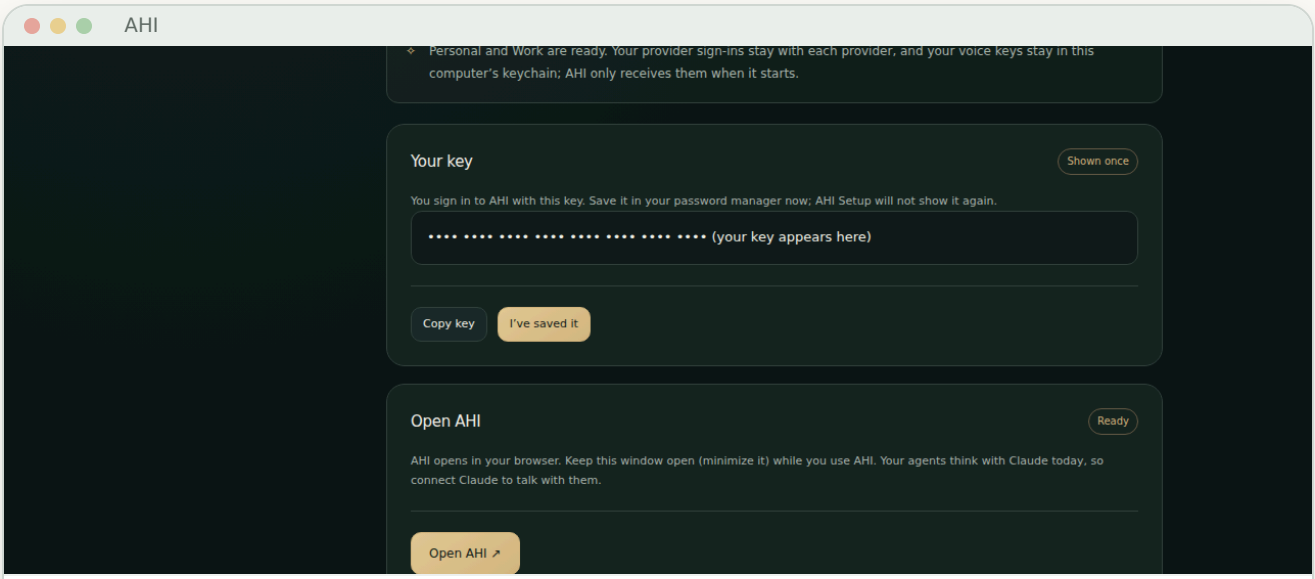

Access anywhere.

Connections for later.

9 Finish, and save your key

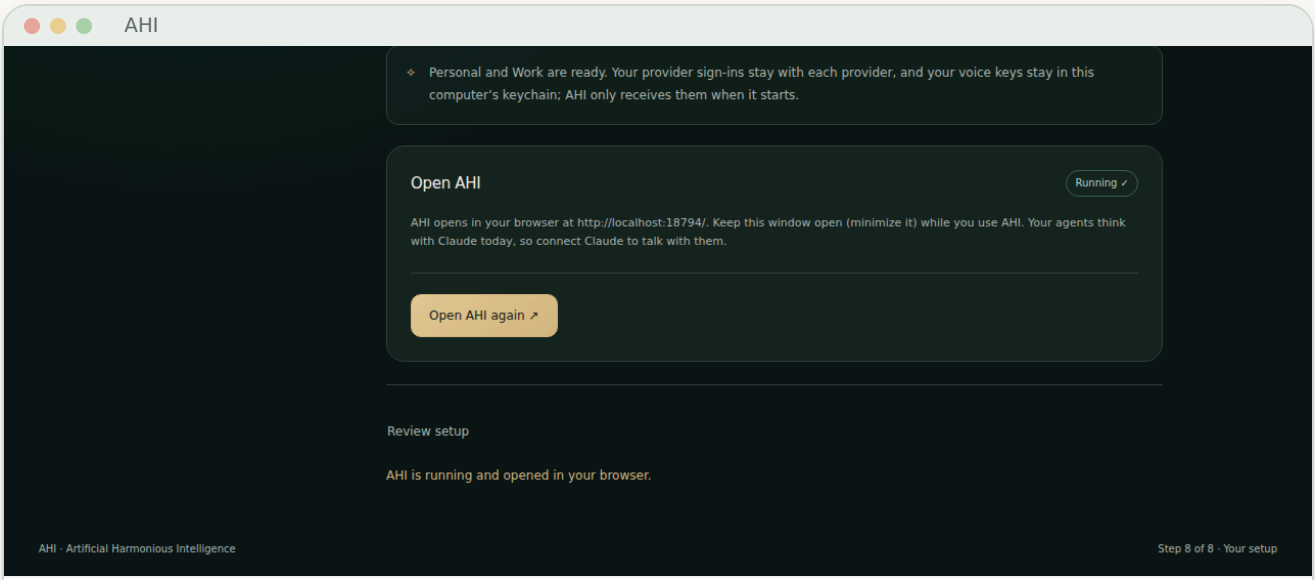

Press **Finish setup**. AHI Setup installs AHI in your folder and shows **your key** — once. Press **Copy key**, save it in your password manager, then **I've saved it**. This key is how you sign in.

Your key, shown once (hidden in this picture).

10 Open AHI

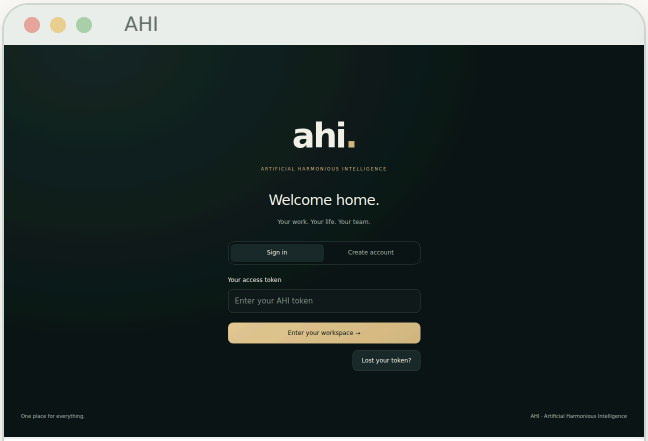

Press **Open AHI**. AHI starts and opens in your browser. Keep AHI Setup open while you use AHI (minimized is fine); next time, just open AHI Setup and AHI starts by itself.

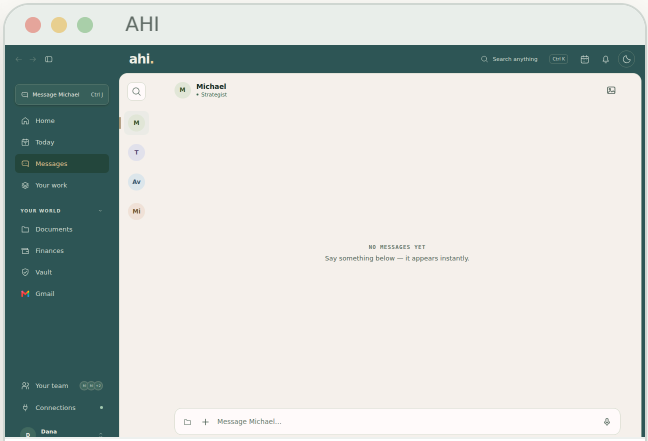

AHI running.

11 Sign in and say hello

Paste your key and press **Enter your workspace**. You'll land in your conversation with Michael, with Tzali, Avi and Miriam beside him. Say hello, and tell him a little about your work and your week.

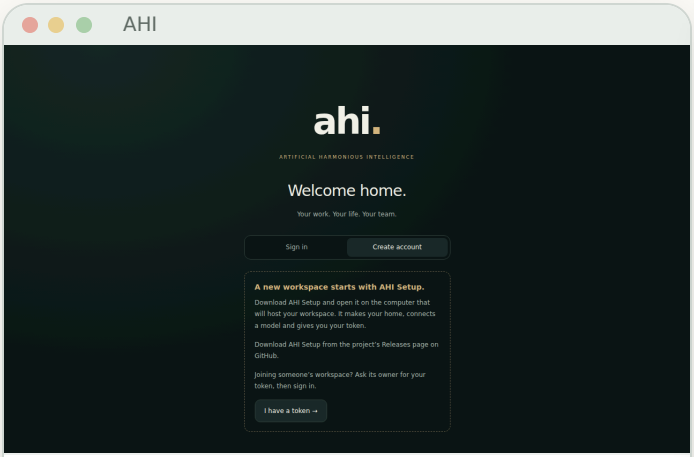

Signing in with your key.

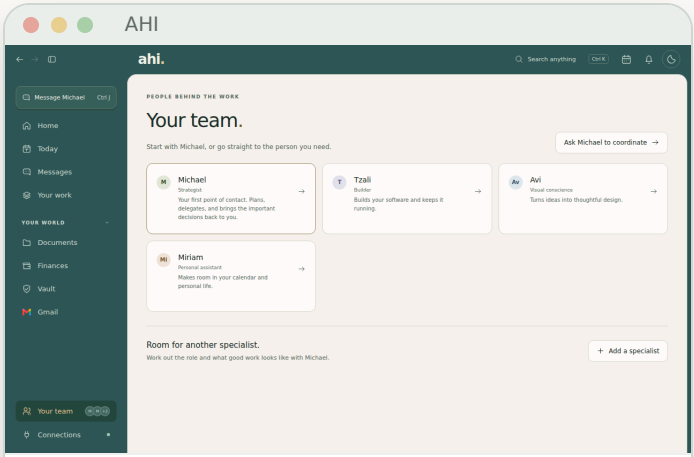

Your first conversation.

JOINING SOMEONE ELSE'S SPACE?

If someone already runs AHI and invited you, you don't need AHI Setup: open their address, ask them for your key, and sign in. **Create account** on the sign-in screen points anyone starting their own to AHI Setup.

Create account points to AHI Setup.

Your team.

ahi.

Good to know

Everything lives in the folder you chose; your helpers' memory and your documents are files you own and can back up.

AHI runs while AHI Setup is open. Your helpers think with Claude in this version; Codex and Gemini connect, and will be used in later versions.

Staying up to date. Open **Settings → Updates**. AHI checks the project's Releases page and tells you when a newer version is out. Your helpers' skills (the step-by-step know-how they use, kept on shelves such as video, design and code quality) install with **Update skills**; a newer AHI itself comes as a new AHI Setup from the same page. Your folder and memory stay.
